My Book Review

Book title: -----

Author: -----

How did the book make you feel?

Draw your favourite part of the book and write a sentence to go with the picture.

03.12.2020

Maths

WALT: apply knowledge of weight to problems

Wednesday 2nd December

1. Are these objects...

The same weight
Different weight

2.

The cupcake weighs _____ cubes.

The grapes weigh _____ cubes.

The cupcake is _____ than the grapes. (*heavier/lighter*)

3.

Can you order the objects from heaviest to lightest?

 = 3 pencils  = 8 pencils  = 4 pencils

Ball Teddy Bear Sock

4. True or false...

The class are seeing whether the balloon or apple will weigh more.

 Eva The balloon will be heavier because it is bigger than the apple.

The balance will be level because they are both red.  Whitney

Topic

Lava lamps are used to relax people. Here is a video of a lava lamp action. [Mehrfarbige Lavalampe zum entspannen oder als TV Hintergrund - YouTube](#)

Can you create your own?

Lava Lamp

You Will Need

- Water
- Vegetable Oil*
- A Clear Plastic Bottle or Jar
- Food Colouring
- Effervescent Tablets

* Please dispose of oil safely and responsibly.

Method

- 1 Fill the bottle or jar a quarter full with water.
- 2 Top up, almost to the top with the vegetable oil
- 3 They should separate into two layers, water at the bottom and oil sitting on top.
- 4 Add about 6-8 drops of food colouring once the oil and water separate.
- 5 The colour will mix with the water at the bottom.
- 6 Pop in half an effervescent tablets and watch the bubbles form. Add more effervescent tablets bit by bit to keep the bubbles rising and falling.

The Science Bit

Firstly water and oil will not mix – this is because we say that water is a polar molecule – its structure means that it has a positive charge one end and a negative charge the other. Water molecules stick together because the positive end of one water molecule is attracted to the negative end of another. Oil molecule structure is different – it is non polar, meaning that its charge is more evenly spread out, so the oil is not attracted to water – in fact we call it hydrophobic (water fearing) so it tries to get as far away from water as possible and will not mix. The reason that oil rests on top of the water rather than underneath is because it has a different density to water.

As the effervescent tablets is added (this is made of citric acid and sodium bicarbonate) it reacts with the water and form carbon dioxide gas and sodium citrate. It is the carbon dioxide bubbles that carry the coloured water to the top.

Year 1 Phonics

04.12.2020

Reading and Writing

Write a sentence about one of the characters in our story *The Monkey with the Bright Blue Bottom* explaining where they live. Think about the work we did on adjectives describing the characters and the jungle.

Remember to use:

- Capital letters
- Finger spaces
- Neat handwriting
- Full stops

Draw a picture to go with your sentence in the green box on the next page.

04.12.2020

Maths

WALT: understand and compare capacity

Friday 4th December

1.

The most full, is jug _____

The emptiest is jug _____

Number the jugs from the least to the most amount of liquid.

2.

Which container holds less? Please circle.

3.

Which container holds more? Please circle.

4.

5.

What is the capacity of your shoe? What did you use to measure it and how many did you count? Ideas - pasta, beads, peas, baubles, leaves.
