

# Curriculum Intent - MFL

## The MFL Curriculum:

- Helps to equip pupils with the knowledge and cultural understanding needed to succeed at life
- Ensures that all pupils of all abilities can develop their language knowledge through clear sequences of learning that allow the children to understand and make connections between Spanish and their own language/s
- Promotes high expectations of children's learning and understanding of Spanish

## Our MFL Curriculum is designed to:

Provides an opening for enquiry into other cultures, encouraging pupils to appreciate and celebrate differences between themselves and others

Promotes an interest and understanding of the wider world through looking at Spanish-speaking countries culture, history, celebrations, lifestyle, and customs in comparison to their own experiences by immersing them within the countries traditions

Provide the children with opportunities to develop their linguistic understanding and application through speaking, listening and writing through explicit teaching and medium term planning

Academic

Social

Empower the children to develop a positive view of themselves as language learners through consistently clear tasks and challenges

Teach clear building blocks of languages for children to develop their understanding of reading and conversing in Spanish, such as sounds, words and rules around phonics, vocabulary and grammar

Emotion

Develop a passion for languages through exposing children to Spanish and BSL in their Primary education

Have high expectations and aspirations with languages to meet the needs of all our learners, and provide opportunities to access a range of languages using resources available to ensure all learners participate in MFL.

"Different journey - same destination"
